

PROFESSIONAL SUMMARY

Senior Software Engineer with 5 years of experience in Automation Testing and Quality Assurance. Expertise in designing and implementing scalable automation frameworks using Python, Selenium, Robot Framework, and Pytest. Strong experience in CI/CD integration using Jenkins, version control with Git, and advanced reporting using Allure. Proven ability to reduce manual effort, improve test coverage, and ensure high-quality product delivery in Agile environments.

EDUCATION

Bachelor of Engineering (BE- ECE)

Panimalar Engineering College - Anna University,
Chennai
2016 - 2020
Percentage : 83.1 %

Higher Secondary (12th Standard)

Government Higher Secondary School
Completed in 2016 | 93.42%

Secondary School Leaving Certificate (10th Standard)

Government Higher Secondary School
Completed in 2014 | 94.8%

TECHNICAL SKILLS

- **Primary Skills :** Python (Advanced)
- **Automation tools:** Selenium WebDriver, Robot Framework, Pytest
- **Reporting:** Allure Reports, Extent Reports
- **API Testing:** Postman, REST API, JSON, XML
- **Database:** MySQL, PostgreSQL
- **Defect Tracking Tool & Test Management :** JIRA, Bugzilla , qTest and QA Home
- **Operating Systems:** Windows, Linux(CentOS, SLES)
- **Version Control:** Git
- **IDEs & Tools :** VSCode, Pycharm
- **AI Tools for Productivity :** Copilot, Codeium, LLM
- **Virtualization Tools:** VMware ESXi, vCenter, Datastore, RAID, RAIN, Backup, Restore, vCloud Director, Dell Avamar

PROFESSIONAL EXPERIENCE

Hexaware Technologies

Senior Software Engineer Aug 2025 - Present

- Designed and developed scalable automation frameworks using Pytest, improving reusability and maintainability.
- Integrated automation test suites into Jenkins CI/CD pipelines, enabling continuous testing.
- Implemented Allure reporting for detailed test insights and faster debugging.
- Reduced test execution time by optimizing scripts and parallel execution.
- Collaborated with cross-functional teams to ensure early defect detection and faster release cycles.
- Played a key role in improving automation coverage and stability of test suites.

HCL Technologies

Software Engineer Feb 2021 - Aug 2025

- Developed and executed automated test scripts using Selenium with Robot Framework for enterprise applications.
- Performed functional, regression, integration, and system testing, ensuring high-quality releases.
- Achieved ~20% reduction in defect leakage by strengthening QA processes and automation coverage.
- Built reusable automation components and keywords, minimizing script duplication and maintenance effort.
- Conducted API testing using Postman, validating backend services and integrations.
- Worked closely with developers to identify root causes and improve defect resolution time.
- Maintained test scripts using Git version control and followed best coding practices.
- Participated in Agile ceremonies (Sprint Planning, Daily Standups, Retrospectives).
- Assisted in test planning, test case design, and test data preparation.
- Contributed to improving test strategy and QA best practices across projects.

DOMAIN SKILS

- VMware ESXi host configuration and management
- vCenter administration and cluster management
- vCloud Director deployment and configuration
- VM provisioning, cloning, and lifecycle management
- vMotion (live VM migration) and resource optimization
- Datastore creation, management, and performance tuning
- RAID and RAIN concepts for data protection
- Storage architectures: DAS, NAS, SAN
- Avamar Backup & Restore management
- Storage and VM performance monitoring & troubleshooting

PROJECT EXPERIENCE

ENGINEERING AND RESEARCH DEVELOPMENT DIVISION, HCLTECH

Dell Avamar Backup & Recovery Product

- Dell Avamar Backup & Recovery Product
- Automated complex workflows for backup, restore, replication, and deduplication.
- Validated functionality across VMware environments and multiple platforms.
- Developed automation scripts to reduce regression cycle time significantly for Avamar.
- Conducted performance testing to validate storage efficiency.
- Ensured data integrity and reliability through comprehensive testing strategies.

DA COMPETENCY, HEXAWARE TECHNOLOGY

Carlyle Engineering

- Developed and executed automated test scripts for 4 enterprise applications (ASM, Capital Marketing, CPE, Valuation) using Python and Selenium WebDriver.
- Built and enhanced test automation frameworks with reusable components, improving maintainability and scalability.
- Implemented CI/CD pipelines using Jenkins for automated test execution and continuous feedback.
- Utilized Git for version control, including branching, merging, and code management in collaborative environments.
- Designed and executed functional, regression, and cross-browser testing to ensure application quality.
- Performed test case design, test data management, and defect tracking, ensuring timely issue resolution.
- Improved automation efficiency by optimizing scripts, reducing execution time and manual effort.
- Collaborated with developers, business analysts, and QA teams in Agile/Scrum environments to deliver high-quality releases.

KEY ACHIEVEMENTS

- Reduced manual testing effort by 30% through automation implementation.
- Improved defect detection rate, reducing production issues significantly.
- Recognized with Best Employee Award at HCL Technologies for two times.
- Developed a VM health monitoring automation tool, saving significant manual effort.
- Developed three value-add script and submitted to the team.
- Consistently delivered high-quality releases within tight deadlines.

PERSONAL DETAILS

- Father Name : Annadurai (Late)
- Mother Name : Rajakumari
- Date of Birth : 03-03-1998
- Gender : Male
- Marital Status: Married
- Language : Tamil and English
